Email: chinmaygireeshs@gmail.com

Address: Bangalore, Karnataka, India

As a skilled problem solver, I possess strong coding and debugging abilities. With excellent listening, organizational, and critical thinking skills, I develop effective solutions that meet both technical and business needs. Committed to delivering high-quality work on time and on budget, I am a results-driven individual with a passion for using technology to solve problems.

SKILLS

Programming Languages:	C#, JavaScript, SQL, C++, python-3.x, PHP, TypeScript
Libraries & Frameworks	.NET Framework / .NET Core, Angular, RxJS, Cordova, Apache Parquet
Tools & Platforms	Docker, Docker Compose, Kubernetes (basic), Redis, Firebase, MS SQL, Azure, OAuth 2.0 / OIDC, Git, PowerShell scripting, Entity Framework

EXPERIENCE

Full Stack Web Developer

Scientific Games
Bangalore, Karnataka

July 2021-Present

Technologies: **c#, asp.net-core, sql-server, angular, asp.net-mvc, TFS, Out System, object-oriented,programming, Restful API, Azure, SSIS Packages, Microservices**

Lead Developer – Claims Module

Technologies Used: **asp.net CORE, SQL-server, entity framework, SSIS, Out System, Docker, Microservice Services**

- Successfully took over full responsibility for the Claims module from the American team and provided comprehensive training to teammates within 30 days. Currently leading and overseeing the development of the Claims module, a critical system handling transactions worth millions of dollars. Implemented new functionality for generating and printing checks directly from the module, enhancing operational efficiency.

Lead Developer – Claims Module

Technologies Used: **SQL server, SQL Server Profiler, Query Store, Execution Plan**

- Optimized database performance by analyzing query execution and indexing strategies, resulting in a 30% improvement in system efficiency. This achievement earned recognition in the Hall of Fame at Scientific Games

Full Stack Web Developer

RCKR Software
Bangalore, Karnataka

July 2021-Feb 2024

Technologies: **asp.net, sql-server, angular, IONIC, Cordova, Docker, object-oriented programming, Restful API Web Services, Azure, Type Script, RxJS**

Improved Patient Data Download Job by 75% for MyCareCorner Portal

Technologies Used: **asp.net, SQL-server, python 3, .NET Profiler tools, Linq, XPath, Azure Functions**

- Successfully optimized background download job for downloading patient data in MyCareCorner Patient Portal, resulting in a significant reduction of major time delays.
- Directly impacted over 400,000 users with the modification of the download job logic.
- Achieved more than 75% improvement in download job performance through strategic modifications.

MyCareCorner Patient Portal Modification for CHBase-Unify Compatibility

Technologies: **OAuth 2.0, OIDC, Microsoft Owin, XSLT, Docker, .NET Core, Azure**

- Contributed significantly to the modification of the **MyCareCorner** patient portal web application, making it compatible with CHBase-Unify, a new consolidated platform for patient, clinical, and enterprise apps
- Architected a microservice using .NET Core
- Improved MyCareCorner's global compatibility and enabled integration with expert systems and AI tools
- MyCareCorner is a patient portal with over 400,000 active users, developed by CPSI (Computer Programs and Systems, Inc.)

OTHER PROJECT

Jira Chrome Extension | Personal Project

August 2022- August 2022

Technologies: **JavaScript, HTML, CSS, jQuery**

- Developed a Chrome extension to streamline JIRA ticket management by automating the calculation of story points from the original estimated time. This tool significantly reduces the workload for developers, allowing them to focus on coding rather than tedious administrative tasks.

File Secure | Academic Project

November 2020 - January 2021

Technologies: **PHP, My SQL, AES algorithm, html, css, bootstrap**

- "File Secure" is a highly secure web-based platform that utilizes the principles of visual cryptography to safeguard critical files. This advanced system provides excellent protection against potential quantum computing attacks.

Collagebase | Personal Project

December 2019 – December 2019

Technologies: **Android studio, java, google fire-base**

- Developed an Android messaging app, Collage Base, that enables college students to communicate privately or in groups, using Java programming and user interface design skills to create private and group chat functionalities.

EDUCATION

2017-2021	Government Engineering College Thrissur Bachelor of Technology, Computer Science & Engineering	CGPI: 7.3/10
2014-2017	12th (Higher Secondary Examination) Memunda Higher Secondary School, Vadakara	Percentage: 93%
2013-2014	10th (SSLC) Sanskrit H S, Vattoli	Percentage: 95%

ACHIEVEMENTS

- Received the prestigious Bharath Scouts and Guides Rashtrapati Award for leadership, presented by the President of India.**

This achievement demonstrates my ability to lead and effectively work within a team, as well as my commitment to personal growth and development. I am proud to have received this prestigious award and believe that it showcases my dedication to excellence in all aspects of my life.
